
Question
who directed movie written by ken hixon
5 gold answers · 8 agents · 42 pooled candidates
Agent outputs
Kimi L=3 pat o connor · michael caton jones · jake scott
DeepSeek L=31 michael mann · mike nichols · john badham · …
grok, gpt-5.4 L=3 each john mackenzie · michael polish · …
4 others L=1 each one item each
Support pattern S(c) — what counting reads
≥ 2 asserters john sayles, john mackenzie — both wrong
all 3 correct asserted by one agent, |S(c)| = 1
also enters the scorer as features
Generation behaviour B(c) — what we add
all 3 correct positions 1–3 of Kimi's 3-item list
silent agents four at L=1; DeepSeek at L=31
position and graded omission
Claim Scorer → Keep Budget
92 features over S(c) and B(c) → probability p_c
$k^*(q) = \arg\max_k \; 2\sum_{i \le k} p_i / (k + \hat{G}_q)$
Kept set
kept pat o connor · michael caton jones · jake scott — all 3 correct candidates in the pool
